

SURGEX®

THE MOST TRUSTED NAME IN POWER PROTECTION

SX1213i

SURGE ELIMINATOR & POWER CONDITIONER

- *Advanced Series Mode*® Surge Protection
- *Impedance Tolerant*® EMI/RFI Filtering

The SX1213i provides guaranteed surge protection and power conditioning for audio, video, broadcast and computer equipment.

The units are 13-amp load-capable and have 10 industrial grade earthed IEC/AC receptacles (8 switched, 2 always on) plus a front-panel courtesy receptacle. A rear panel warning light will indicate incorrect polarity of the AC supply.

The unit features both common mode and normal mode *Impedance Tolerant*® EMI/RFI filtering for a comprehensive power conditioning solution.

SurgeX *Advanced Series Mode*® technology is superior to conventional MOV circuitry or MOV-Hybrid designs and is completely non-sacrificial. Our zero let-through technology provides the most reliable protection available. It stops all surges up to 6,000 volts (unlimited surge current) without producing harmful side effects such as earth contamination or common-mode disturbances.
